

GenAI Story Generator Project Documentation

Project Title

GenAI Story Generator using OpenAI Concepts and Hugging Face Transformers

Introduction

This project generates AI-based stories from user prompts such as Python, Data Science, SAP, and Data Analytics using the GPT-2 transformer model.

Objectives

Generate stories from prompts, demonstrate Generative AI and NLP, and provide educational content.

Technologies

Python, Hugging Face Transformers, GPT-2, PyTorch, Jupyter Notebook.

Workflow

User enters topic → GPT-2 model → AI generates story → Output displayed.

Features

Dynamic story generation, multiple topics, simple interface.

Future Enhancements

Streamlit UI, OpenAI API integration, multilingual stories, PDF export.
